

GERMAN ARMY INFANTRY

1/35 MILITARY MINIATURE SERIES

This kit contains 2 sprues or mouldings. One contains four figures numbered 1,2,3 & 4. Plus two arms A-R and A-L for the prone figure No.3 and three bases for the standing figures.

The second sprue has alternative arms for Fig. 3, plus guns, spare helmets and other accessories.

The complete figures Nos. 1,2 & 4 should be carefully removed from the sprue with a sharp modelling knife. Also remove the excess pieces of plastic, which are used in the mould-

ing process. Clean-up the resulting rough areas, using fine sand paper. After painting mount onto bases.

Fig. 3 can be either a machine gunner, or an observer with binoculars. Decide which one of these is to be constructed and use the appropriate arms. The accessories should be painted before they are attached to the figures.

The picture on the box gives a good idea of how to paint your figures. Accessories such as spare helmets etc. can be used in making an attractive diorama.
