 手、汎用性の高い3体の小銃手を躍動感あるポーズでモデル化。服装や装備品も大戦中に使われたタイプをリアルに再現。エンフィールド・ライフルやルイス軽機関銃、ガスマスクケースや水筒なども忠実に立体化。ライフルは銃剣なしと銃剣付きの2種類をセットしました。ヘルメットは通常タイプに加え布製カバー付きも選べます。
 《軍装について》第一次大戦中のイギリス歩兵は、1902年に採用されたP02野戦服を着用し、その上から機能的なP08装備を身に付けていました。これらは視認性の低いカーキ系の色調が特徴で、一般兵士はゲートル、士官はレギンスを足元に着用。大戦中盤以降は上空からの弾片防御を重視した血型のヘルメットが支給され、反射防止用の布製カバーも使用されました。

《Set Components》5 adaptable figures accurately depict British infantry from WWI, including officer, machine gunner and 3 riflemen. Uniforms are also faithfully captured, as are accessories such as Lee Enfield rifles, Lewis machine guns, gas mask pouch, canteen and more. Rifles feature optional bayonet parts, while helmets can be attached with or without canvas cover.
 《About the Uniform》British infantry from WWI were issued with Pattern 1902 uniform and Pattern 1908 webbing to be worn over the top. Both were manufactured in khaki for camouflage reasons. On their lower legs, infantrymen wore puttees and officers leggings. From the middle of the conflict, steel helmets were distributed and often had canvas covers to reduce reflection.
