XANAVI NISMO GT-R (R35)

ITEM 58412 TB-03

L: 435mm **4WD** ASSEMBLY KIT

2008 saw the Nissan GT-R burst back on the racing scene, and in conjunction, Tamiya is releasing the Xanavi NISMO GT-R (R35) as a 1/10 scale R/C model on the TB-03 chassis. The bathtub frame comes with a motor cooling duct to improve heat dissipation for better performance. A newly designed one-piece aluminum motor mount makes changing and adjusting gears a breeze. It also comes equipped with front and rear ball differentials for greater power transmission efficiency. The Inboard Front Suspension system features horizontally-mounted dampers to enable mounting of the GT-R's distinctive low-profile aerodynamic polycarbonate body shell.

Super GT 300 Class Champion

Tamiya is proud to release the 2007 Japan Super GT Series 3rd Round Fuji Speedway winning ARTA Garaiya race car as a 1/10 scale assembly kit R/C car. Longitudinally placed motor and various race-spec parts are loaded on the 4WD shaft driven TB-03 chassis. In addition to the bathtub frame's low center of gravity, it comes with motor cooling ducts which improve heat dissipation. Also included are front and rear ball differentials and 3-piece high precision propeller shaft for greater power transmission efficiency and a 4-wheel double wishbone, Inboard Front Suspension system.
