

# F-104® Starfighter® G/S

**RF UPGRADED EDITION**

**EN**

The Lockheed F-104 Starfighter is one of the most famous fighters in the history of aviation and also one with the longest operational life: its history began at the end of the 50s and ended, for some air forces, in mid 2000s. Its unique airframe, with slender fuselage and very little wing surface, made this aircraft ideal as an interceptor. Thanks to the thrust of its General Electric J79-GE-11A afterburning turbojet engine, it could exceed Mach 2,2 with an excellent rate of climb. But it was not very manoeuvrable and difficult to pilot. The F-104G Starfighter was produced on license by several European aviation industries. From the mid-60s, it became the standard interceptor for many NATO countries including Italy, Germany, Holland, Greece, and Turkey. The armament was basically the same found on previous versions, with a 20mm Vulcan cannon and the option to fit under the wings air-to-air missiles, bombs, or additional fuel tanks to increase the airplane's range. With time, reconnaissance duties were added to the traditional interceptor service. The F-104G was therefore equipped with a dedicated "Orpheus" reconnaissance external pod that gave excellent operational results.

**FR**

Le Lockheed F-104 Starfighter est l'un des avions de chasse les plus célèbres dans l'histoire de l'aviation, ainsi que l'un de ceux qui ont duré le plus longtemps, avec une vie professionnelle qui a commencé à la fin des années 50 et a pris fin, pour certaines aviations militaires, au milieu des années 2000. Avion unique pour sa structure aérodynamique avec un fuselage allongé et des surfaces d'ailes extrêmement réduites. Sa structure le rendait idéal comme intercepteur de combat capable de dépasser, grâce à la poussée de son moteur turboréacteur General Electric J79, Mach 2,2 avec une vitesse de montée en altitude extraordinaire. Il n'était cependant pas très maniable et était difficile à piloter. Le F-104G Starfighter a été produit sous licence par plusieurs industries aéronautiques européennes. Depuis le milieu des années 1960, il est devenu le chasseur intercepteur de référence de nombreux pays de l'OTAN, notamment l'Italie, l'Allemagne, les Pays-Bas, la Grèce et la Turquie. L'armement était essentiellement celui des versions originales avec un canon Vulcan de 20mm et la possibilité de transporter des missiles air-air, des bombes ou des réservoirs supplémentaires pour augmenter son autonomie de vol. Le rôle traditionnel de chasseur intercepteur a également été rejoint par celui de reconnaissance. Le F-104G a donc été équipé d'un pod de reconnaissance externe « Orpheus » qui offrait d'excellents résultats d'exploitation.

**EN ATTENTION - Useful advice!**

Study the instructions carefully prior to assembly. Remove parts from frame with a sharp knife or a pair of scissor and trim away excess plastic. Do not pull off parts. Assemble the parts in numerical sequence. Use plastic cement ONLY and use cement sparingly to avoid damaging the model. Black arrows indicate parts to be glued together. White arrows indicate on which frame the parts must be assembled WITHOUT using cement. These letters (A - B - C...) indicate on which frame the parts will be found. Paint small parts before detaching them from frame. Remove paint where parts are to be cemented. Crossed out parts must not be used.

**FR ATTENTION - Conseils utiles!**

Avant de commencer le montage, étudier attentivement le dessin. Détailler avec beaucoup de soin les morceaux des moulés en usant un massicot ou bien un paire de ciseaux et couper avec une petite lame avec de papier de vinre fin ébarbagés éventuels. Jamais détacher les morceaux avec le mains Monter les en suivant l'ordre de la numération des tables. Eliminer de la moulé le numéro de la pièce qui vient d'être montée, en le biffant avec une croix. Les flèches noires indiquent les pièces à coller, les flèches blanches indiquent les pièces à monter sans colle. Employer seulement la colle pour polystyrol. Les lettres (A - B - C...) aux cotés des numéros indiquent la moulé où se trouve la pièces a monter. Les pièces marquées par une croix ne sont pas à utiliser.

**IT**

Il Lockheed F-104 Starfighter è uno tra i più famosi caccia della Storia dell'aviazione ed è anche uno tra i più longevi con una vita operativa iniziata alla fine degli anni '50 e conclusasi, per alcune aviazioni militari, alla metà degli anni 2000. Aereo unico per struttura aerodinamica con la fusoliera allungata e le superfici alari estremamente ridotte. La sua struttura lo rendeva ideale come caccia intercettore in grado di superare, grazie alla spinta del motore turbogetto General Electric J79, Mach 2,2 con una straordinaria velocità di salita in quota. Era però poco manovrabile e difficile da pilotare. L'F-104G Starfighter fu prodotto su licenza da diverse industrie aeronautiche Europee. È diventato, a partire dalla metà degli anni '60, il caccia intercettore di riferimento di molti Paesi NATO tra cui l'Italia, la Germania, l'Olanda, la Grecia e la Turchia. L'armamento era sostanzialmente quello delle versioni originali con un cannone Vulcan da 20 mm. e la possibilità di trasportare sotto le ali missili aria-aria, bombe, o serbatoi supplementari per aumentarne l'autonomia di volo. Al tradizionale compito di caccia intercettore si è affiancato anche quello di ricognizione. L'F-104G è stato così dotato di un pod esterno dedicato a ricognizione "Orpheus" che forniva ottimi risultati operativi.

**RU**

Локхид F-104 Старфайтер - один из самых известных истребителей в истории авиации, а также один из «долгожителей»: оперативная деятельность истребителя началась в 50-х годах и завершилась в некоторых странах Европы в середине 2000-х годов. Это самолёт уникальной аэродинамической конструкции - с удлинённым фюзеляжем и очень короткими консолями крыла. Благодаря своей конструкции, он был идеальным истребителем-перехватчиком, способным превышать скорость звука (Mach 2,2), благодаря своему турбореактивному двигателю General Electric J79, и чрезвычайно быстро набирать высоту. Однако, он был трудновоуляемым и мало маневренным. Истребитель F-104G Starfighter по лицензии производился на различных европейских авиазаводах. Начиная со середины 60-х годов, он стал ориентиром, что касается истребителей-перехватчиков, для многих стран НАТО, в том числе для Италии, Греции, Греции и Турции. Базовый комплект вооружения, в основном, состоял из 20-мм пушки Vulcan в оригинальной комплектации, а также с возможностью транспортировать под крылом подвески ракет воздух-воздух, бомб или дополнительных топливных баков для увеличения автономии полёта. К традиционным задачам истребителя-перехватчика добавилась также функция самолёта-разведчика. Таким образом, F-104G был оснащён наружной контейнерной системой фоторазведки «Orpheus», обеспечивающей отличные оперативные результаты.

- EN** **WARNING:** Model for adult modelers age 14 and over
- IT** **ATTENZIONE:** Modello per collezionisti adulti di età superiore ai 14 anni
- FR** **ATTENTION:** Modèle pour modélistes de 14 ans et plus.
- DE** **ACHTUNG:** Modellbausätze Für Modellbauer über 14 Jahre.
- NL** **WAARSCHUWING:** Geschikt voor 14 jaar en ouder.
- ES** **ATENCION:** Modelo para modelistas mayores de 14 años.

**IT ATTENZIONE - Consigli utili!**

Prima di iniziare il montaggio studiare attentamente il disegno. Staccare con molta cura i pezzi dalle stampate, usando un taglia-balsa oppure un paio di forbici e togliere con una piccola lima o con carta vetro fine eventuali sbavature. Mai staccare i pezzi con le mani. Montarli seguendo l'ordine delle numerazione delle tavole. Eliminare dalla stampata il numero del pezzo appena montato facendogli sopra una croce. Le frecce nere indicano i pezzi da incollare, le frecce bianche indicano i pezzi da montare senza colla. Usare solo colla per polistirolo. Le lettere (A - B - C...) ai lati dei numeri indicano la stampata ove si trova il pezzo da montare. I pezzi sbarrati da una croce non sono da utilizzare.

**FR ПРЕДУПРЕЖДЕНИЕ - чистые!**

Перед тем, как приступить к сборке, внимательно изучить чертеж. Очистить от остатков растянутые элементы, использовать для этого канцелярский нож или пару ноцниц, снять неровности с помощью тонкого лезвия или с помощью абразивной бумаги. Не отсоединять элементы руками. Выполните сборку согласно порядку нумерации таблиц, удалить из спички только что собранную деталь, перечеркнуть ее. Чёрные стрелки указывают детали для склейки, белые стрелки указывают детали, которые собираются без клея и используются только для пенопласта. Буквы (A - B - C...) на пронумерованных сторонах указывают лист, где находятся деталь, перечеркнутые детали не использовать.

**DE**

Der Lockheed F-104 Starfighter ist eines der berühmtesten Jagdflugzeuge in der Geschichte der Luftfahrt und er gehört auch zu den langlebigsten mit einer Einsatzdauer, die in den 50er Jahren beginnt und mit der Nutzung durch einige Luftwaffen Mitte der 2000er Jahre endet. Ein einzigartiges Flugzeug dank seiner aerodynamischen Konstruktion mit dem verlängerten Rumpf und den extrem reduzierten Flügeloberflächen. Seine Konstruktion machte ihn zum idealen Abfangjäger, der dank des Turbo-Jet Antriebs J79 von General Electric Mach 2,2 mit einer enormen Steigfluggeschwindigkeit überschreiten konnte. Er war jedoch nicht gut steuerbar und schwierig zu fliegen. Der F-104G Starfighter wurde unter Lizenz von mehreren europäischen Unternehmen der Flugzeugindustrie hergestellt. Ab Mitte der 60er Jahre wurde er zum wichtigsten Abfangjäger vieler Nato-Staaten, darunter Italien, Deutschland, die Niederlande, Griechenland und die Türkei. Die Waffenbestückung war vornehmlich die Originalversion mit einer 20 mm Vulcan Kanone und der Möglichkeit, unter den Tragflächen Luft-Luft Raketen, Bomben oder zusätzliche Tanks für längere Flüge zu transportieren. Zur traditionellen Aufgabe als Abfangjäger kam die eines Aufklärungsflugzeugs hinzu. Der F-104G wurde so mit einem externen Aufklärungspod „Orpheus“ ausgestattet, der exzellente Ergebnisse lieferte.

**ES**

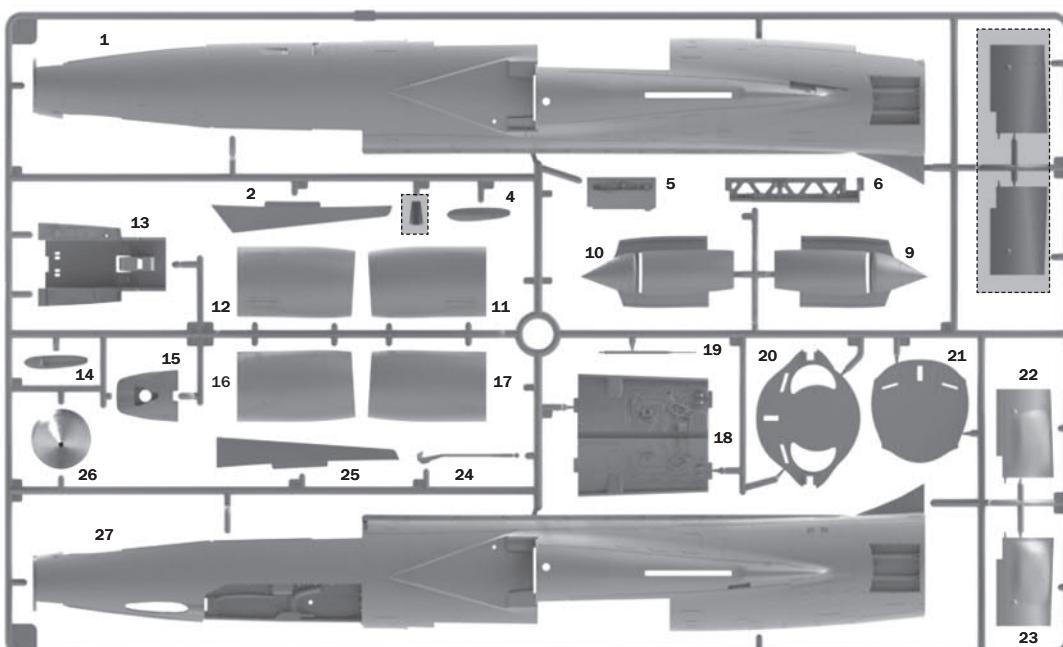

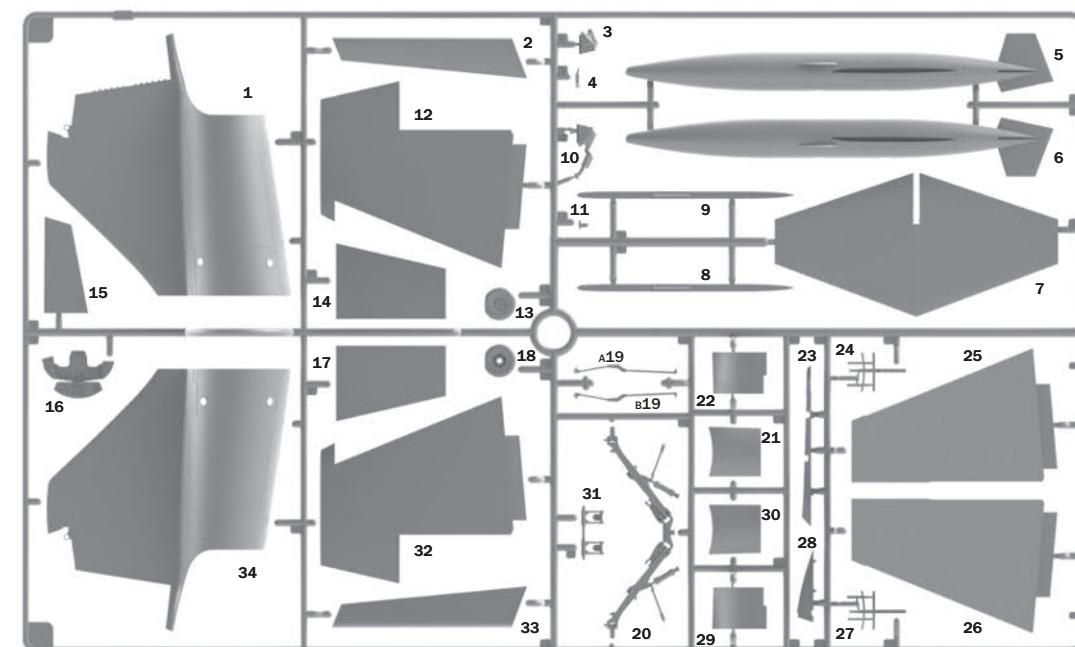

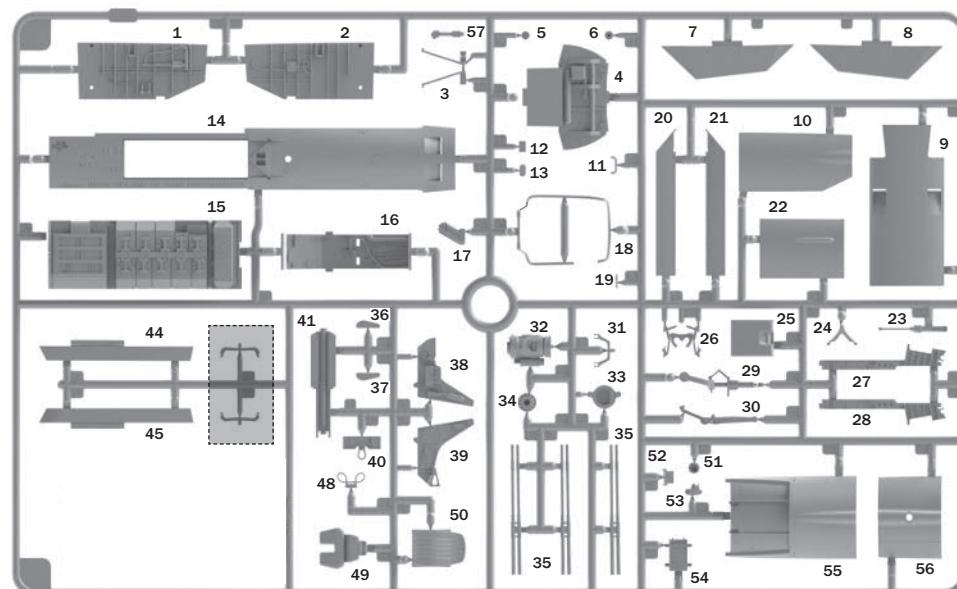

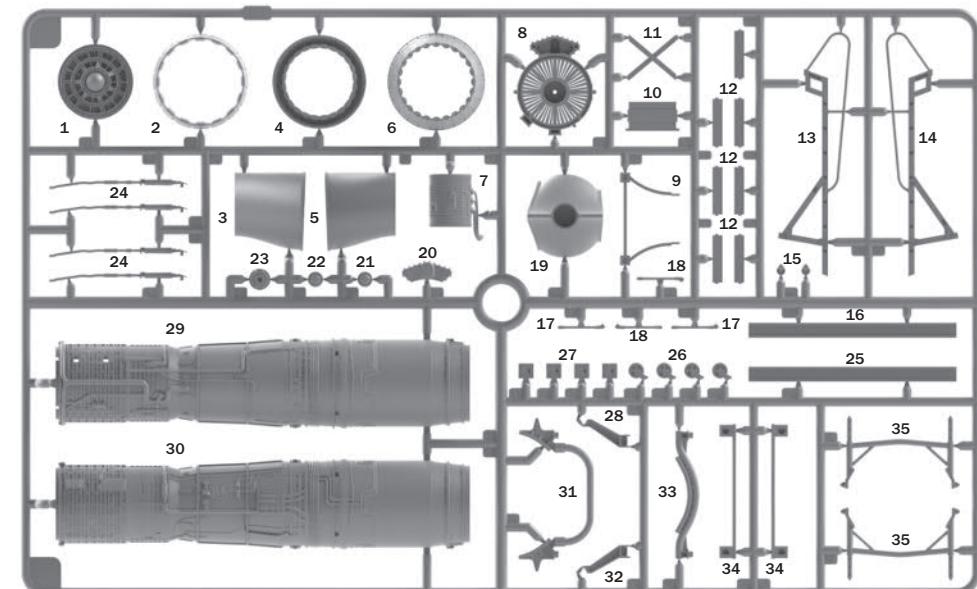

El Lockheed F-104 Starfighter es uno de los caza más famosos de la historia de la aviación y uno de los más longevos con una vida operativa iniciada a finales de los años cincuenta del siglo XX, que concluyó, para algunas aviones militares, a mediados de los años 2000. Se trata de un avión único por su estructura aerodinámica con el fuselaje alargado y las superficies alares muy reducidas. Gracias a su estructura, era ideal como caza interceptor capaz de superar, gracias al empuje del motor turboreactor General Electric J79, Mach 2,2 con una extraordinaria velocidad de subida a cota. Sin embargo, era poco maniobrable y difícil de pilotar. El F-104G Starfighter fue fabricado a partir de licencia por diferentes industrias aeronáuticas europeas. A partir de los años sesenta del siglo XX se convirtió en el caza interceptor de referencia de muchos países de la OTAN entre los que se encontraba Italia, Alemania, Holanda, Gracia y Turquía. El armamento era sustancialmente el de las versiones originales con un cañón Vulcan de 20 mm, y la posibilidad de transportar bajo las alas aire-aire, bombas, o depósitos suplementarios para aumentar su autonomía de vuelo. A su tarea tradicional de caza interceptor, se sumó la de reconocimiento. De esta forma, el F-104G se equipó con un módulo externo específico de reconocimiento "Orpheus" que proporcionaba óptimos resultados operativos.

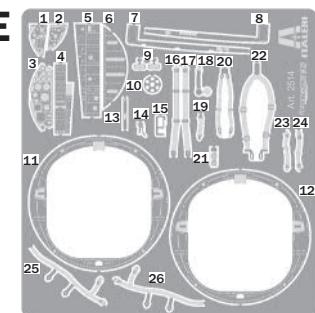

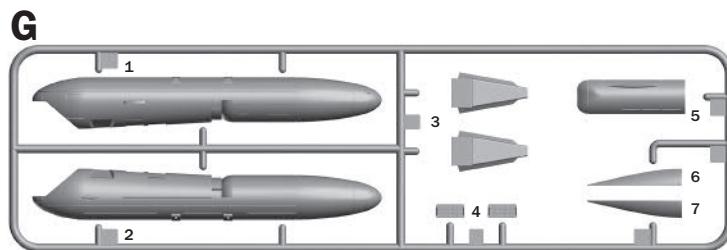

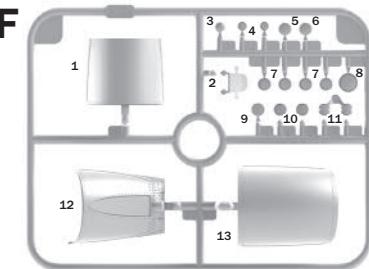

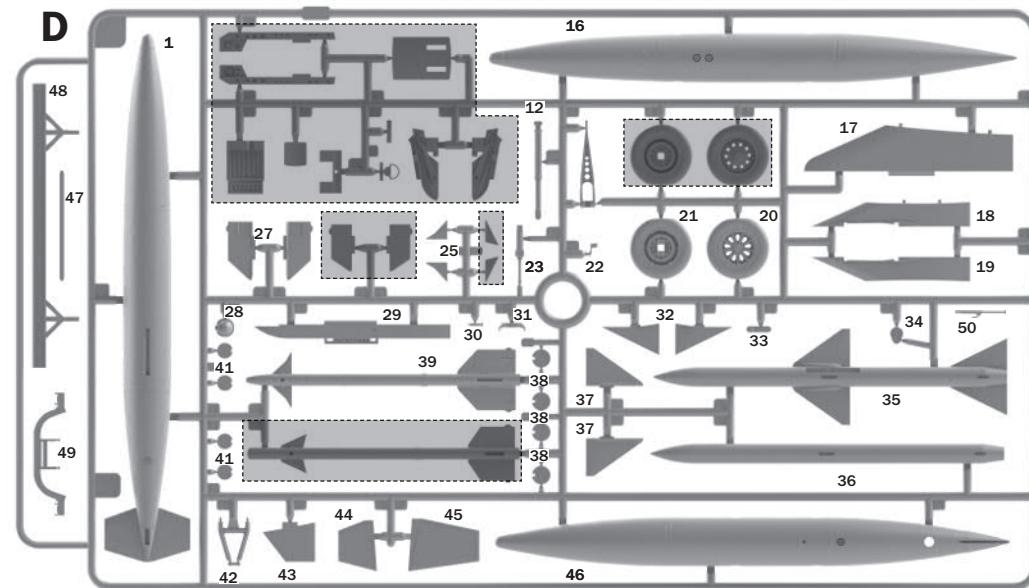

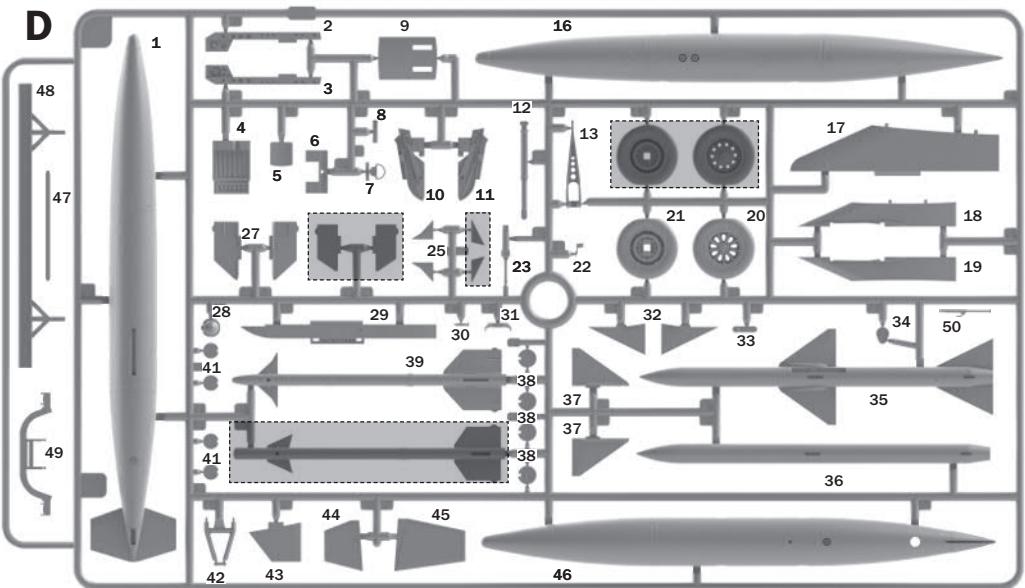

**DE ACHTUNG - Ein nützlicher Rat!**

Vor der Montage die Zeichnung aufmerksam studieren. Die einzelnen Montageteile mit einem Messer oder einer Schere vom Spritzling entfernen. Eventuelle Grate werden mit einer Klinge oder feinem Schmiegelpapier beseitigt. Keinesfalls die Montageteile mit den Händen entfernen. Bei der Montage der Tafelnummern folgen. Pfeile zeigen die zu klebenden Teile während die weißen Pfeile die ohne Leim zu montierenden Teile anzeigen. Bitte nur Plastikklebstoff verwenden. Die Buchstaben (A - B - C...) neben den Nummern zeigt, auf welchem Spritzling der zu montierende Teil zu finden ist. Die mit einem Kreuz markierten Teile sind nicht zu verwenden.

**ES ATENCION - Consejos útiles!**

Estudiar las instrucciones cuidadosamente antes de comenzar el montaje. Separar las piezas de las bandejitas con un cuchillo afilado o un par de tijeras y retirar el exceso de plástico o rebaba. No arrancar las piezas. Montar las piezas en orden numérico. Utilizar SOLAMENTE pegamento para plástico y en poca cantidad para evitar que se dane el modelo. Las flechas negras indican las piezas que deben ensamblarse SIN usar pegamento. Las flechas blancas indican las piezas que deben ensamblarse SIN usar pegamento. Las letras (A - B - C...) en las piezas indican la pieza en la que se encuentra la pieza a montar. Las piezas marcadas con una cruz no deben ser utilizadas.
