# Ju 87 D-5 Stuka

## EN

The JU-87 dive bomber is certainly one of the most famous airplanes of World War II. This characteristic “inverted gullwing” aircraft became famous at the early stages of the war, when Germany had virtual air superiority. Later on the planes’s limits became obvious. The Stukas were then used as troop support aircraft on the Eastern front, where its robust fuselage proved to be quite adequate. During the final war period the plane was used as a night bomber where the flying qualities of its crews were important in a situation of technical and numeral inferiority.

## IT

Il bombardiere in picchiata JU-87 è sicuramente uno degli aerei del secondo conflitto mondiale più noti. Questo caratteristico velivolo dall’ala a “gabbiano” conquistò grande fama all’inizio della guerra in una situazione di generale superiorità dell’aviazione tedesca; con il progredire del conflitto mostrò tutti i suoi limiti e venne confinato al ruolo dell’appoggio alle truppe nel quale grazie alla notevole robustezza della cellula si dimostrò adeguato, particolarmente sul fronte orientale. Nell’ultima fase della guerra lo Stuka venne utilizzato anche come bombardiere notturno utilizzando al meglio le qualità dei suoi equipaggi in una situazione di inferiorità tecnica e numerica assoluta.

## DE

Der Sturzkampfbomber JU-87 ist sicher eines der bekanntesten Flugzeuge des 2. Weltkrieges. Dieses Flugzeug mit den charakteristischen “Möwenflügeln” errang einen guten Ruf zu Kriegsbeginn, als Deutschland noch die Luftüberlegenheit inne hatte. Mit Fortschreiten des Krieges zeigten sich seine Leistungsgrenzen und es wurde nur mehr zur Truppenunterstützung an der Ostfront eingesetzt, wo besonders seine robuste Bauweise von Vorteil war. Gegen Ende des Krieges wurde der Sturzkampfbomber auch als Nachtbomber eingesetzt. Die fliegerische Leistung der Piloten mußte die technische und zahlenmäßige Unterlegenheit ausgleichen.

## FR

Le bombardier en piqué JU 87 est certainement l’un des appareils les plus connus de la Seconde Guerre Mondiale. Ses fameuses “ailes de mouettes inversées” devinrent célèbres dans les premiers mois de la guerre, lorsque les Allemands avaient acquis la totale suprématie de l’air. Très vite, les limites de l’appareil devinrent évidentes. Les stukas furent alors utilisés comme support de troupes sur le front de l’est où son robuste fuselage se montra parfaitement adapté. Durant la dernière période de la guerre, les stukas furent employés en bombardier de nuit où la qualité de ses équipages était primordial dans une situation d’infériorité numérique et technique.

## ES

El bombardero em picado JU-87 es ciertamente uno de los aviones más famosos de la II GM. Este característico aparato de “ala de gaviota invertida” se hizo famoso en las primeras etapas de la guerra, cuando los alemanes tenían virtual superioridad aérea. Más tarde las limitaciones del aparato se hicieron patentes. Entonces los Stukas se utilizaron como aviones de apoyo en el Frente del Este, donde su robusto fuselaje demostró ser muy adecuado. Durante el periodo final de la guerra fué usado como bombardero nocturno resultando muy importantes las capacidades de vuelo de sus tripulaciones dada la situación de inferioridad técnica y numérica.

## NL

De Ju-87 Stuka was zonder twijfel één van de beroemdste vliegtuigen van de 2e Wereldoorlog. Dit vliegtuig met zijn karakteristieke vleugels werd berucht tijdens het begin van de oorlog, toen Duitsland nog superieur was in de lucht. Later, toen de tekortkomingen van dit toestel aan het licht kwamen, werd het aan het Oostfront ingezet, waar het, mede dankzij zijn stevige romp, toch nog adequaat kon opereren. Tegen het einde van de oorlog werd het toestel als nachtbombenwerper gebruikt, waarbij de vliegkwaliteiten van de bemanning belangrijker waren dan de technische eigenschappen van het vliegtuig.

**EN ATTENTION - Useful advice!**

Study the instructions carefully prior to assembly. Remove parts from frame with a sharp knife or a pair of scissors and trim away excess plastic. Do not pull of parts. Assemble the parts in numerical sequence. Use plastic cement ONLY and use cement sparingly to avoid damaging the model. Black arrows indicate parts to be glued together. White arrows indicate on which frame the parts must be assembled WITHOUT using cement. These letters (A - B - C...) indicate on which frame the parts will be found. Paint small parts before detaching them from frame. Remove paint-where parts are to be cemented. Crossed out parts must not be used.

**IT ATTENZIONE - Consigli utili!**

Prima di iniziare il montaggio studiare attentamente il disegno. Staccare con molta cura i pezzi dalle stampate, usando un taglia-balsa oppure un paio di forbici e togliere con una piccola lima o con carta vetro fine eventuali sbavature. Mai staccare i pezzi con le mani. Montarli seguendo l'ordine delle numerazione delle tavole. Eliminare dalla stampata il numero del pezzo appena montato facendogli sopra una croce. Le frecce nere indicano i pezzi da incollare, le frecce bianche indicano i pezzi da montare senza colla. Usare solo colla per polistirolo. Le lettere (A - B - C...) ai lati dei numeri indicano la stampata ove si trova il pezzo da montare. I pezzi sbarrati da una croce non sono da utilizzare.

**DE ACHTUNG - Ein nützlicher Rat!**

Vor der Montage die Zeichnung aufmerksam studieren. Die einzelnen Montageteile mit einem Messer oder einer Schere vom Spritzling sorgfältig entfernen. Eventuelle Grate werden mit einer Klinge oder feinem Schmirgelpapier beseitigt. Keinesfalls die Montageteile mit den Händen entfernen. Bei der Montage der Tafelnummerierung folgen. Pfeile zeigen die zu klebenden Teile während die weissen Pfeile die ohne Leim zu montierenden Teile anzeigen. Bitte nur Plastikklebstoff verwenden. Die Buchstaben (A - B - C...) neben den Nummern zeigt, auf welchem Spritzling der zu montierende Teil zu finden ist. Die mit einem Kreuz markierten Teile sind nicht zu verwenden.

**FR ATTENTION - Conseils utiles!**

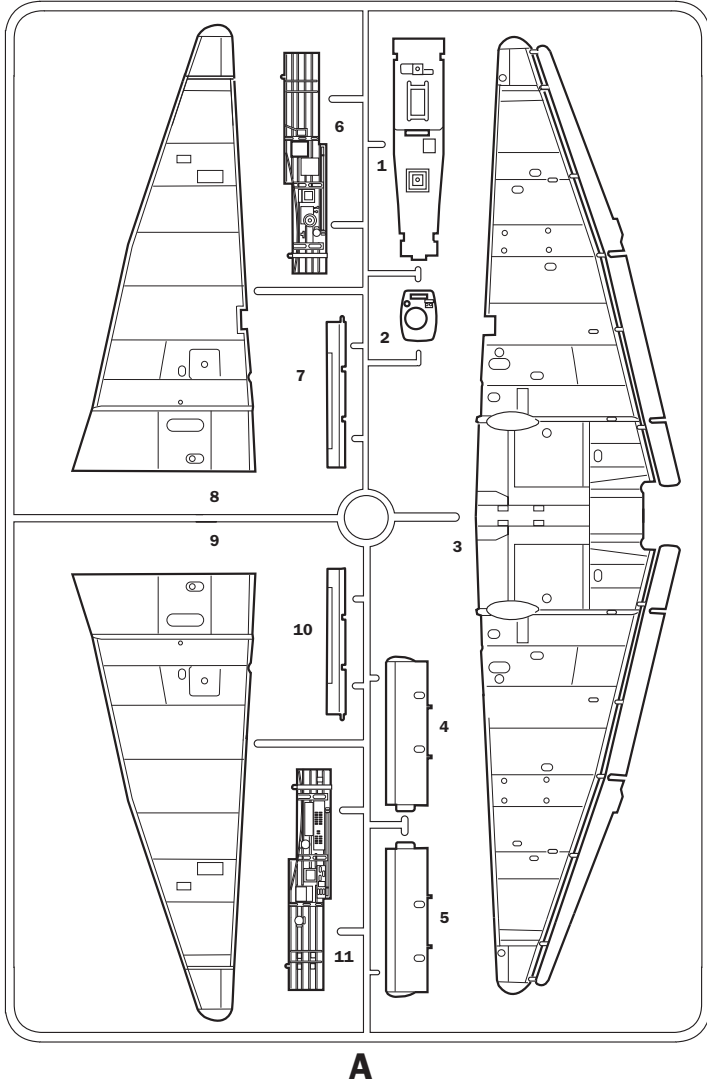

Avant de commencer le montage, étudier attentivement le dessin. Détacher avec beaucoup de soin les morceaux des moules en usant un massicot ou bien un pair de ciseaux et couper avec une petite lame avec de papier de verre fin ébarbagés éventuels. Jamais détacher les morceaux avec le mains Monter les en suivant l'ordre de la numération des tables. Eliminer de la moule le numéro de la pièce qui vient d'être montée, en le biffant avec une croix. Les flèches noires indiquent les pièces à coller, les flèches blanches indiquent les pièces à monter sans colle. Employer seulement de la colle pour polystirol. Les lettres (A - B - C...) aux côtés des numéros indiquent la moule où se trouve la pièces à monter. Les pièces marquées par une croix ne sont pas à utiliser.

**NL OPGELET - Belangrijke bemerkingen!**

Bestudeer zorgvuldig het montageplan voor het bouwen. Breek nooit onderdelen van het kader. Maak ze los met een scherp mes of kleine nageltang. Verwijder daarna al het overtoellige plastic en pas de delen alvorens te lijmen. Gebruik allen lijm voor plastic modellen. Werk zorgvuldig en spaarzaam, teveel lijm zal uw model beschadigen. Zwarte pijlen duiden de te lijmen delen aan. Witte pijlen verwijzen naar bewegende delen welke niet mogen worden gelijmd. Deze letters (A - B - C...) geven de kaders aan waarin de onderdelen zich bevinden. Schilder de kleine onderdelen voor ze van het kader te snijden. Verwijder de verf van de te lijmen oppervlakten.

**ES ATENCION - Consejos útiles!**

Estudiar las instrucciones cuidadosamente antes de comenzar el montaje. Separar las piezas de las bandejas con un cuchillo afilado o un par de tijeras y retirar el exceso de plástico o rebada. No arrancar las piezas. Montar las piezas en orden numérico. Utilizar SOLAMENTE pegamento para plástico y en poca cantidad para evitar que se dane el modelo. Las flechas negras indican las piezas que se deben pegar juntas. Las flechas blancas indican las piezas que deben ensamblarse SIN usar pegamento. Las letras (A - B - C...) indican en que bandeja se encuentran las piezas. Pintar las piezas pequeñas antes de separarlas de la bandeja. Retirar la pintura de los lugares por donde se deban pegar las piezas.

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie occorrenti dal foglio, immergerle in un bicchiere di acqua pulita per circa 10", metterle in posizione sul modello e farle scivolare dalla carta: per una migliore aderenza compprimerle con una pezzuola pulita.

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 10"; position the decals on the kit, letting them slide from the paper. For a better adhesion, press them by means of a clean rag.

Påsättning av decalcer: klipp ut den decal som skall användas och doppa den i ett glas vatten under en 10". Sätt decalerna på plats på modellen och låt den sakta glida av pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Anbringung: Die benötigten Abziehbilder vom Blatt abscheiden, in ein Glas reines Wasser für etwa 10" eintauchen, auf das Modell legen und dann vom Papierbogen abnehmen. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem reinen Tuch andrücken.

Instruction pour l'application des décalcomanies. Couper les décalcomanies choisies et les plonger environ 10" dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

Istrucciones Para la aplicación de las calcomanías: cortar las requeridas, sumergirlas en un recipiente de agua limpia durante 10", colocar las calcomanías sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapito limpio.

Transfers: knip het benodigde deel uit, dempel et ca. 10" onder water, oudt het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.

デカール使用法 台紙から、それぞれのマークを切り取ります。ぬるま湯に20秒くらいつけて、引き上げます。マークをすべらすようにして台紙から取り、指定の位置にはってください。かわらかな布でマークを押しつけて完成させてください。マーク面には、かわくまで手をふれないでください。

Указания по применению декалей: Отрежьте нужную вам часть декалей от общего листа, поместите ее на 1/2 минуты в чистую воду, затем, выбрав необходимое место на модели, переведите туда изображение, сдвинув его с бумажной основы. Для лучшего прилипания промажьте декаль чистой тряпочкой.
