Willys Jeep MB 80th Anniversary 1941-2021

EN

In 1940, after World War II had broken out, the US general staff ordered various factories to design a light multi-purpose vehicle with all-wheel drive. The American Bantam Company, Willys Overland, and Ford Motor Co. competed with each other. Willys prototype was chosen, which, after an initial run of 1500 vehicles, went into mass production at the beginning of 1941 and reached a total output of 640.000 units out of which 277.000 pieces were produced by Ford under a licensing agreement. This shows that the Jeep was the most widely produced light vehicle of the war industry during World War II.

FR

En 1940, après le début des hostilités, l'Etat-Major des Etats-Unis lance un concours pour la construction d'un véhicule léger à quatre roues motrices, susceptible d'être affecté à de nombreux usages. Ce concours vit la participation de l'American Bantam Company, de la Willys Overland Motor et de la Ford Motor Co. Le choix tomba sur l'exemplaire de Willys. A partir de 1941, après une première série de 1500 véhicules, celui-ci fut mis sur les chaînes de montage et fabriqué à 640.000 exemplaires, dont 277.000 sur licence Ford. Aussi la Jeep a-t-elle été le véhicule le plus fabriqué par l'industrie de guerre durant le second conflit mondial.

IT

Nel 1940, a conflitto mondiale già iniziato, lo Stato Maggiore degli Stati Uniti indisse un concorso per la costruzione di un veicolo leggero a quattro ruote motrici che servisse a numerosi impieghi. Alla gara parteciparono la American Bantam Company, la Willys Overland Motor e la Ford Motor Co. La scelta cadde sull'esemplare Willys, che, dopo una preserie di 1500 veicoli a partire dal 1941 fu messo sulle catene di montaggio e prodotto in ben 640.000 esemplari, di cui 277.000 su licenza della Ford. Questo fa sì che la "Jeep" sia stato il veicolo costruito nel maggior numero di esemplari dall'industria bellica durante il secondo conflitto mondiale.

ES

En 1940, después de iniciada la Segunda Guerra Mundial, el Comando General de los EEUU ordenó a varias fábricas el diseño de un vehículo liviano de propósito múltiple con tracción total. La compañía American Bantam, Willys Overland y Ford Motor Co. compitieron entre ellos. El prototipo de Willys fue seleccionado, el cual, después de una producción inicial de 1500 vehículos, entró a producción en masa a comienzos de 1941 alcanzando un total de 640.000 unidades, de las cuales 277.000 fueron producidas por Ford bajo licencia. Esto demuestra que el Jeep fue el vehículo ligero de mayor producción por la industria de guerra durante la Segunda Guerra Mundial.

DE

Im Jahr 1940, als der 2. Weltkrieg schon ausgebrochen war, schrieb der Generalstab der USA einen Wettbewerb zur Konstruktion eines leichten Fahrzeugs mit Allradantrieb aus, das zu verschiedenen Zwecken verwendet werden könnte. An dem Wettbewerb beteiligten sich American Bantam Company, Willys Overland Motor und Ford Motor Co. Die Wahl fiel auf das Modell Willys, das, nach einer Anfangsserie von 1500 Fahrzeugen, von Beginn des Jahres 1941 an, in 640.000 Einheiten auf Fließband produziert wurde, davon 277.000 in Lizenz bei Ford. Das zeigt, da der Jeep das meistproduzierte Fahzeug der Kriegsindustrie des 2. Weltkriegs war.

RU

Na het uitbreken van de 2e wereldoorlog in 1940 gaf de Amerikaanse Generale Staf opdracht aan de American Bantam Company, Willys Overland en de Ford Motor Company om een licht, 4-wiel aangedreven voertuig te ontwikkelen dat voor meerdere taken geschikt was. Het prototype van Willys werd uitgekozen en, na een aanvangsproductie van 1500 voertuigen, startte de massaproductie in het begin van 1941. In totaal werden er 640.000 stuks van gemaakt, waarvan 277.000 in licentie door Ford. Hiermee werd de Jeep het meest geproduceerde lichte voertuig van de 2e wereldoorlog.

EN ATTENTION - Useful advice!

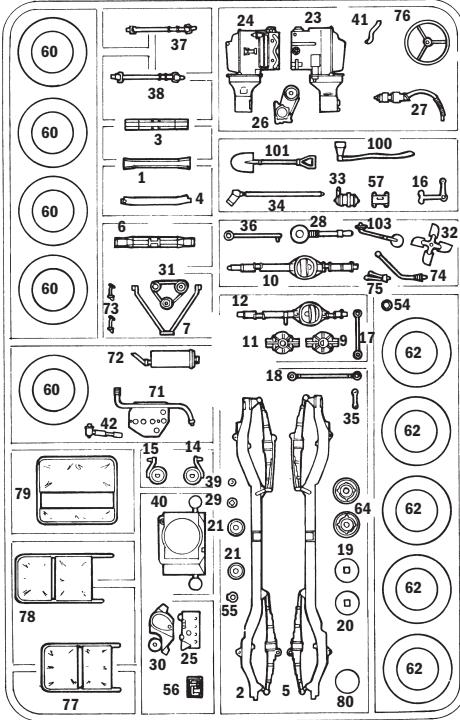

STUDY THE INSTRUCTIONS CAREFULLY PRIOR TO ASSEMBLY. REMOVE PARTS FROM FRAME WITH A SHARP KNIFE OR A PAIR OF SCISSOR AND TRIM AWAY EXCESS PLASTIC. DO NOT PULL OUT PARTS. ASSEMBLE THE PARTS IN NUMERICAL SEQUENCE. USE PLASTIC CEMENT ONLY AND USE CEMENT SPARINGLY TO AVOID DAMAGING THE MODEL. BLACK ARROWS INDICATE PARTS TO BE GLUED TOGETHER. WHITE ARROWS INDICATE ON WHICH FRAME THE PARTS MUST BE ASSEMBLED WITHOUT USING CEMENT. THESE LETTERS (A - B - C...) INDICATE ON WHICH FRAME THE PARTS WILL BE FOUND. PAINT SMALL PARTS BEFORE DETACHING THEM FROM FRAME. REMOVE PAINT WHERE PARTS ARE TO BE CEMENTED. CROSSED OUT PARTS MUST NOT BE USED.

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie occorrenti dal foglio, immergerle in un bicchiere di acqua pulita per circa 20°, metterle in posizione sul modello e farle scivolare dalla carta: per una migliore aderenza comprimerle con una pezzuola pulita.

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 20°; position the decals on the kit, letting them slide from the paper. For a better adhesion, press them by means of a clean rag.

Påsättning av decaler: klipo ut den decal som skall användas och doppa den i ett glas vatten under en 20°. Sätt decalen på plats på modellen och låt den sakta glida på pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Abbringung: Die benötigten Abziehbilder vom Blatt abschneiden, in ein Glas reines Wasser für etwa 20° eintauchen, das Modell legen und dann vom Papierbogen abnehmen. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem reinen Tuch andrücken.

Instruction pour l'application des décalcomanies: Couper les décalcomanies choisies et les plonger environ 20° dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

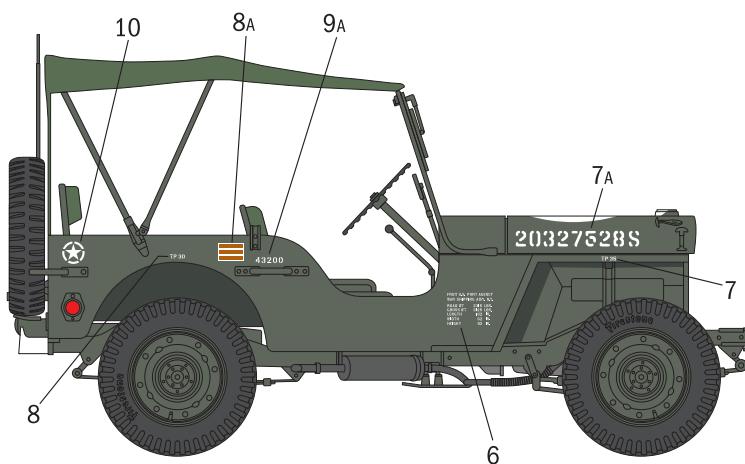

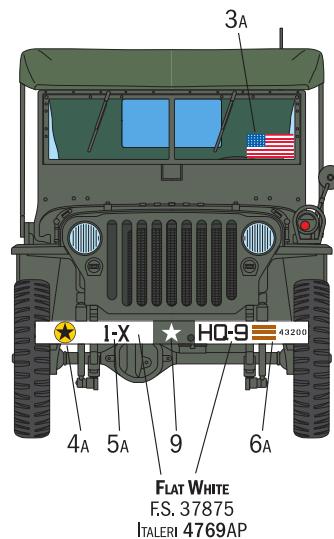

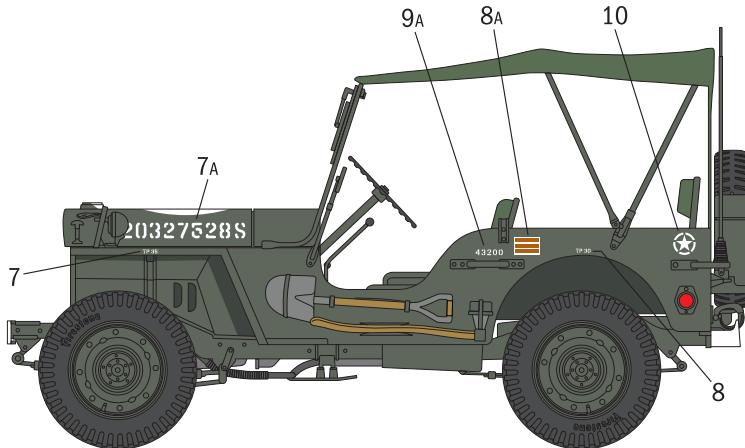

Instrucciones para la aplicación de las calcomanías: cortar las requeridas, sumergirlas en un recipiente de agua limpia durante 20°, colocar las calcomanías sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapo limpio.

Transfers: knip het benodigde deel uit, dempelt en ca. 20° onder water, oud het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken. テカーラ使用法: 台紙から、それらのマークを切り取ります。ぬるま湯に20°くらいつけて、引き上げます。マークをすべりようにして台紙からとり、指定の位置にはってください。やわらかな布でトーラ上を押して気泡を抜いてください。マーク面には、かわりまで手をおねいでください。

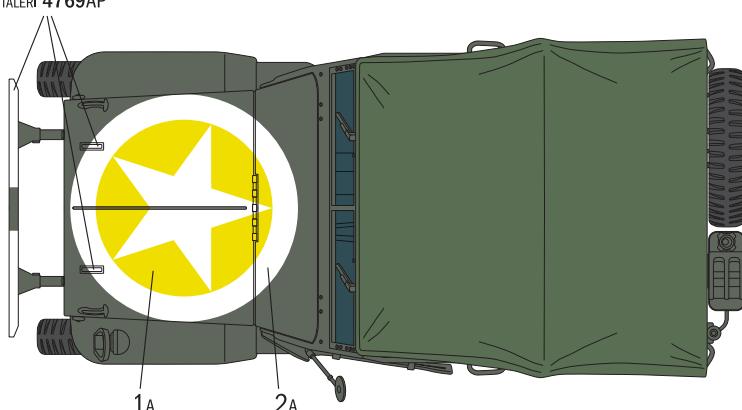

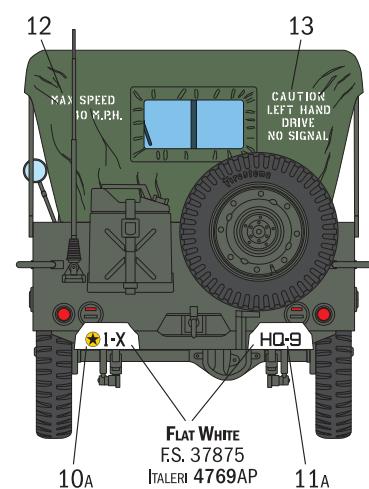

Указания по применению декалей: отрежьте нужную вам часть декали от общего листа, поместите ее на 20° минуту в чистую воду, затем, выбрав необходимое место на модели, переведите туда изображение, сдвинув его с бумажной основы. Для лучшего прилипания промажните декаль чистой тряпочкой.
