# AS 42 Sahariana

EN

The "Camionetta Desertica modello 42 Sahariana" was developed for the Italian Royal Army based on the chassis and mechanics of the reliable armored car AB 41. During operations on the African front, there arose the need for a reconnaissance vehicle particularly suited to desert conditions, where sand terrain demanded specific characteristics not present in available vehicles. Thanks to its low-profile side and large wheels, the "Sahariana" was ideal for reconnaissance operations and conducting swift raids into enemy territory. Its good range enhanced the possibility of employing the vehicle for long-range operations. The type of armament could vary depending on the models and consisted of the Breda 20/65 mod 1935 machine gun, the effective 47/32 anti-tank gun, or the 20 mm Solothurn anti-tank rifle.

La Camionetta Desertica modello 42 "Sahariana" fu sviluppata per conto del Regio Esercito italiano sulla base del telaio e della meccanica della valida autoblinda AB 41. Nel corso delle operazioni sul fronte africano, era apparsa infatti la necessità di un veicolo da ricognizione particolarmente adatto alle condizioni desertiche, dove la marcia su sabbia richiedeva particolari caratteristiche assenti nei mezzi disponibili. Grazie al suo profilo laterale basso e alle sue ruote di grandi dimensioni la "Sahariana" era ideale per le operazioni di ricognizione e per svolgere rapide incursioni in territorio nemico. La buona autonomia esaltava la possibilità di impiegare il veicolo anche per operazioni di ampio raggio. Il tipo di armamento poteva variare a seconda dei modelli ed era costituito dalla mitragliera Breda 20/65 mod 1935, dall'efficace cannone anticarro 47/32 o dal fucile anticarro Solothurn da 20 mm.

DE

Der Desert Truck Modell 42 "Sahariana" wurde im Auftrag des italienischen Regio Esercito auf Basis des Chassis und der Mechanik des zuverlässigen Panzerwagens AB 41 entwickelt. Während der Operationen an der afrikanischen Front entstand tatsächlich die Notwendigkeit eines Aufklärungsfahrzeugs, das besonders für die Wüstenbedingungen geeignet war, wo das Fahren auf Sand besondere Eigenschaften erforderte, die in den verfügbaren Fahrzeugen fehlten. Dank seines niedrigen Seitenprofils und seiner großen Räder war die "Sahariana" ideal für Aufklärungsoperationen und für schnelle Vorstöße in feindliches Gebiet geeignet. Die gute Reichweite betonte die Möglichkeit, das Fahrzeug auch für weitreichende Operationen einzusetzen. Die Art der Bewaffnung konnte je nach Modell variieren und bestand aus dem Maschinengewehr Breda 20/65 Modell 1935, der effektiven Panzerabwehrkanone 47/32 oder dem 20-mm-Panzerabwehrgewehr Solothurn.

RU

Грузовик пустыни модели 42 "Сахаряна" был разработан по заказу итальянской Королевской армии на основе шасси и механики надежного бронированного автомобиля AB 41. Во время операций на африканском фронте возникла необходимость разведывательного транспортного средства, особенно подходящего для пустынных условий, где движение по песку требовало определенных характеристик, отсутствующих у доступных транспортных средств. Благодаря низкому боковому профилю и большим колесам "Сахаряна" была идеально подходящей для разведывательных операций и проведения быстрых рейдов на вражескую территорию. Хороший запас хода подчеркивал возможность использования транспортного средства также для операций на большие расстояния. Тип вооружения мог варьироваться в зависимости от моделей и состоял из пулемета Breda 20/65 модели 1935 года, эффективной противотанковой пушки 47/32 или противотанковой винтовки Solothurn калибром 20 мм.

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie occorrenti dal foglio, immergerle in un bicchiere di acqua pulita per circa 20", metterle in posizione sul modello e farle scivolare dalla carta: per una migliore aderenza comprimerle con una pezzuola pulita.

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 20"; position the decals on the kit, letting them slide from the paper. For a better adesion, press them by means of a clean rag.

Påläggning av decal: klipp ut den decal som skall användas och doppa den i ett glas vatten under en 20". Sätt decalen på plats på modellen och låt den sakta glida av pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Anbringung: Die benötigten Abziehbilder vom Blatt abschneiden, in ein Glas reines Wasser für etwa 20" eintauchen, auf das Modell legen und dann vom Papierbogen abnehmen. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem reinen Tuch andrücken.

Instruction pour l'application des décalcomanies. Couper les décalcomanies choisies et les plonger environ 20" dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

Instrucciones Para la aplicación de las calcomanías: cortar las requeridas, sumergirlas en un recipiente de agua limpia durante 20", colocar las calcomanías sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapio limpio.

Transfers: knip het benodigde deel uit, dempel et ca. 20" onder water, oudt het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.

デカール使用法: 図紙から、それぞれのアークを切り取り、ぬるま湯に20分くらいつけて、引き上げます。アークをすずらすまうにして図紙から取り、指定の位置にはっきりとしたい。やわらかな布でアークを押しつけて、空気を取ってください。アーク面には、かわらぬ手で押しつけてください。

Указания по применению декалей: Отрежьте нужную вам часть декали от общего листа, поместите ее на 20 минут в чистую воду, затем, выбрав необходимое место на модели, переведите туда изображение, сдвинув его с бумажной основы. Для лучшего прилипания промажьте декаль чистой тряпкой.
