

Semovente M42 da 75/34

EN

At the end of the 1930's the Italian Regio Esercito (Royal Italian Army) began to deploy self-propelled artillery guns to provide support for tanks and infantry units. The 'Semovente' 75/18 was developed on the back of the 'M' series medium tank hull and soon became the most feared Italian armored vehicle. In addition to its primary artillery role, the 75mm howitzer installed in the casemate proved to be a highly effective anti-tank weapon, capable of destroying even the most powerful and heavily armored British and American tanks. During the war however, the Italian Regio Esercito requested the development of a version with increased offensive capability. The 75/34 cannon which was originally designed for an anti-tank role, was fitted to the hull of the M42 self-propelled tank. The initial units of which, were distributed to the Italian Army in the spring of 1943. As a result of its effective operational performance, it was also used by German anti-tank battalions after the armistice in September 1943.

IT

Il Regio Esercito, negli anni precedenti la Seconda Guerra Mondiale, manifestò il bisogno di disporre di unità di artiglieria meccanizzata in grado di affiancare i reparti di fanteria e i reparti corazzati. Venne sviluppato, sullo scafo del carro medio "M" il semovente 75/18 che si dimostrò nel corso del conflitto il veicolo corazzato italiano più temuto dagli alleati. Si rivelò infatti, grazie al suo obice da 75mm installato nella casamatta, un'efficace arma anticarro in grado di annientare anche i più potenti e pesantemente corazzati carri armati Inglesi e Americani. Nel corso della guerra venne tuttavia richiesto dal Regio Esercito lo sviluppo di una versione con aumentata capacità offensiva. Sullo scafo del carro semovente M42 venne quindi installato il cannone 75/34 progettato per il tiro controcarro. I primi esemplari furono distribuiti ai reparti italiani nella primavera del 1943. Grazie alle sue buone prestazioni operative venne impiegato, dopo l'armistizio nel settembre del 1943, anche da reparti tedeschi della Wehrmacht.

DE

In den Jahren vor dem Zweiten Weltkrieg drückte die Königliche Armee den Bedarf an mechanisierten Artillerieeinheiten aus, die in der Lage sein sollten, Infanterie- und Panzerdivisionen zu unterstützen. Auf dem Rumpf des mittleren Panzers "M" wurde der selbstfahrende 75/18 entwickelt, der sich während des Kriegs als das von den Alliierten am meisten gefürchtete italienische Panzerfahrzeug erwies. Tatsächlich erwies er sich dank der in der Kasematte installierten 75 mm-Haubitze als eine wirksame Panzerabwehrwaffe, die selbst die stärksten und schwer gepanzerten britischen und amerikanischen Panzer vernichten konnte. Im Laufe des Krieges wurde jedoch von der Königlichen Italienischen Armee die Entwicklung einer Ausführung mit erhöhter Streitkraft gefordert. Daher wurde zur Panzerabwehr auf dem Rumpf des selbstfahrenden Panzers M42 das Geschütz 75/34 installiert. Die ersten Fahrzeuge wurden den italienischen Truppen im Frühjahr 1943 zur Verfügung gestellt. Dank seiner guten Leistungen im Einsatz wurde er auch nach dem Waffenstillstand vom September 1943 von den deutschen Einheiten verwendet.

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie occorrenti dal foglio, immergerle in un bicchiere di acqua pulita per circa 20°, metterle in posizione sul modello e farle scivolare dalla carta: per una migliore aderenza comprimerle con una pezzuola pulita.

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 20°; position the decals on the kit, letting them slide from the paper. For a better adhesion, press them by means of a clean rag.

Påsättning av decaler: klipp ut den decal som ska användas och doppa den i ett glas vatten under en 20°. Sätt decalen på plats på modellen och låt den sätta gida av pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Anbringung: Die benötigten Abziehbilder vom Blatt abschneiden, in ein Glas reines Wasser für etwa 20° eintauchen, auf das Modell legen und dann vom Papierbogen abnehmen. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem feinen Tuch andrücken.

Instruction pour l'application des décalcomanies. Couper les décalcomanies choisies et les plonger environ 20° dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

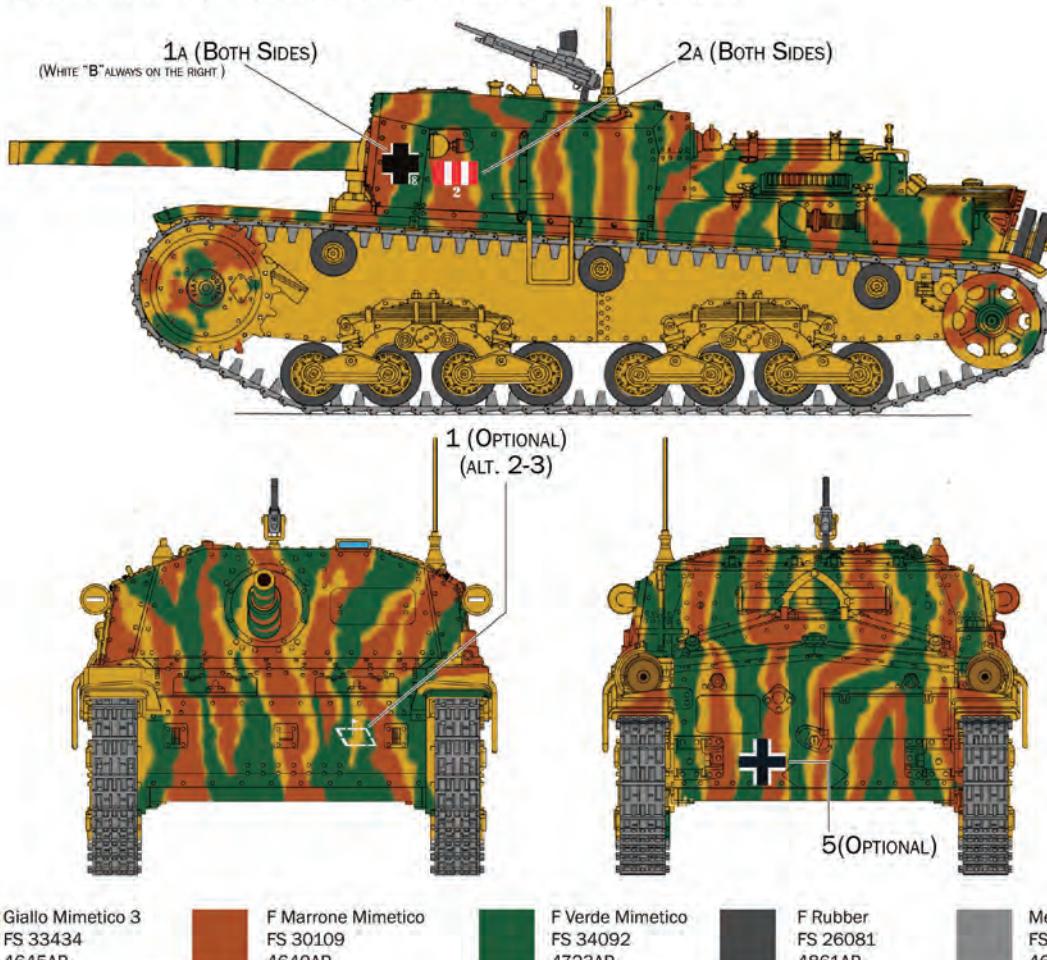

Instrucciones Para la aplicación de las calcomanías: cortar las requeridas, sumergirlas en un recipiente de agua limpia durante 20°, colocar las calcomanías sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapo limpio.

Transfers: knip het benodigde deel uit, dempel et ca. 20° onder water, oudt het transfer tegen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.

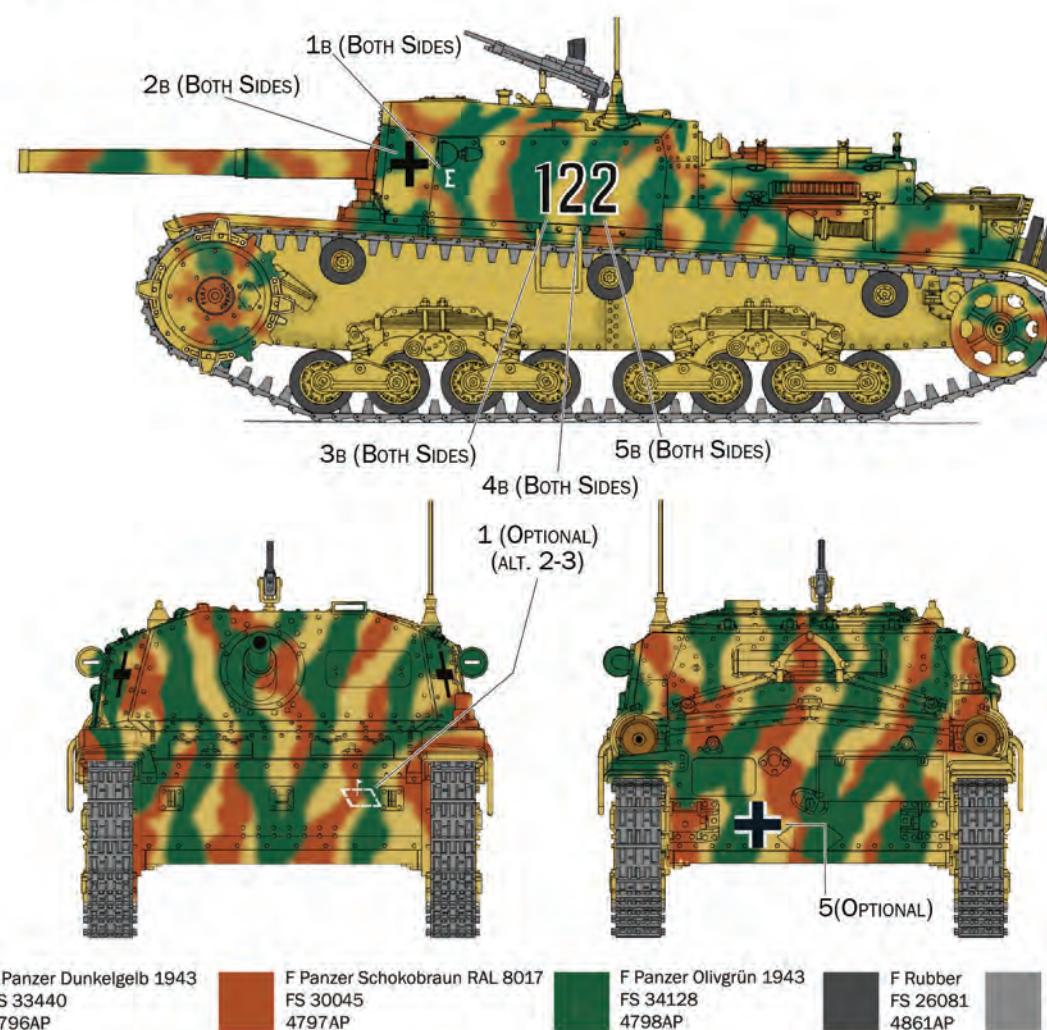

マニホールド保護漆: 宮城から、それまでのマークを切り取ります。必ず正裏に20秒もいって...。引き上げます。マークをオーバーしますようにしては絶対にとり、施設の位置にははぐください。やわらかな布でマーク上を押して気泡を取ってください。マーク面には、かわりますので手をやさないでください。

Указания по применению десалей: Отрежьте нужную вам часть декали от общего листа, поместите ее в 20° минуту в чистую воду, затем, выдрав необходимую часть на модель, переведите туда изображение, сняв его с бумажной основы. Для лучшего прилегания промакните декаль чистой тряпкой.
